## MILMEGA 'AS' Series Solid State Amplifier Range

Model: AS0204-400 Broadband Power Amplifier

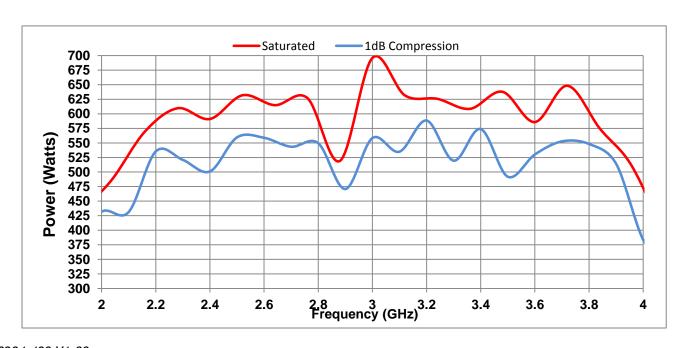

- Mismatch tolerant and
- > unconditionally stable
- High reliability GaAs transistor
- > technology
- Calibrated Dual Directional Coupler fitted as standard
- Ethernet, USB and RS232 or GPIB and RS232 included in price
- Unique 5 year parts and labour warranty.

The ASO204 series of solid state power amplifiers follows the MILMEGA tradition for compact, upgradeable microwave power amplifier solutions with field proven reliability.

Developed to cover the frequency band 2 - 4GHz this GaAs based amplifier produces high power with excellent linearity and low harmonics.

The unit is powered from a switched mode power supply for high efficiency, high power factor and wide voltage range operation. The unit is air-cooled with integral fans, and is protected against faulty cooling by excess temperature sensing. A safety interlock connector is provided, which the user can short circuit to ground, to put the amplifier into standby mode. Front panel indicators are provided to indicate over-temperature and RF interlock condition.
