

BEAM SPLITTER

FLIP-CHIP ULTRA

FLIP - CHIP OPTICS

Tresky's **FLIP-CHIP ULTRA** module is a beam splitter optics, which allows the simultaneous viewing of two objects by an optical overlay (superposition) on the monitor. The Flip-Chip optics has a built-in Ultra HD camera with digital magnification as well as integrated LED lights for optimal illumination of various substrates and components. In combination with the high magnification and the XY-Table Micro Positioning Facility, high accuracy alignment can be reached. Due the module is connected with the bonding head Z-motion it can be used on any height (pick, place,...). The Flip-Chip Ultra module comes with PC and T-Suite Vision software. The software, is easy to use, displays the overlaid image as well switches up to 3 cameras (inspection camera, proces camera, ...).

MICRO ASSEMBLY

All systems of the T-4909 and T-300x series can be upgraded with Flip-Chip Ultra Optics.

TECHNICAL SPECIFICATION:

- 400x digital zoom Ultra HD camera
- Field of view 1,2mm – 6,5mm
- Multi point alignment 30mm x10mm
- LED illumination (up, down and coax)

Ultra HD Camera
4912 x 3684 Px.
