

INVITATION

TECH day

SMART TEST & INSPECTION

The challenges of assuring reliability and quality in electronics manufacturing

Explore the depths of innovative, smart inspection and test technology during our exclusive, free to attend Tech Day.

Meet the experts, attend insightful presentations, and see live demonstrations of cutting-edge equipment in action.

**Join us on March 4
at Accelonix in Eindhoven**

 **PLACES ARE LIMITED**

Confirm your attendance now!

sales@accelonix.nl

AGENDA OF THE DAY

A day designed for learning, exploring and networking

09:00 – Arrival, Coffee & Informal Networking

09:30 – **Accelonix Introduction**

Luc De Bus, Accelonix

09:45 – **TAKAYA: New Flying Prober Generation**

How to contact and reliably test the most challenging and miniaturized PCB assemblies with double side flying probes?

Joerg Lewandowski, Systech/Takaya

10:25 – **Göpel electronics: Innovation in Smart 3D AOI Systems for all PCB Assembly Steps**

New, AI supported Inspection platform for single and double side 3D AOI in SMD or THT assembly and conformal coating process.

Inez Fietze, Göpel electronics

11:00 – **Göpel electronics: JULIET, The JTAG Unlimited Tester**

A complete JTAG boundary-scan tester in a desktop system, suitable for In-Circuit test and programming in prototyping and production applications.

Jan Heiber, Göpel electronics

11:30 – **Aster Technologies: Smart Software to Verify, Assemble and Test Printed Circuit Board Assemblies**

CAD management, DfM/DfT analysis, and test coverage optimization — helping electronics manufacturers detect and prevent defects from the earliest stages.

Christophe Lotz, Aster Technologies

12:00 – Lunch & Informal Networking

13:00 – **Live Equipment Demonstrations**

Experience hands-on demos of our test technologies, machines and software in small rotating groups.

16:00 – Final Remarks

keeping you ahead

LIVE EQUIPMENT DEMONSTRATIONS

1- Takaya APT-2600FD: Double Side Flying Probe tester for fast, accurate and reliable testing of the most challenging electronic boards – **NEW**

2- Göpel electronics Multi-Line 3D AOI: Low Cost, flexible, AI supported Inspection platform for electronics assembly – **NEW**

3- Göpel electronics JULIET: Desktop JTAG supported Test System for ICT, Function Test and In-System Programming.

4- Aster Technologies FABExpress and Testway Express: Software Suite for New Program Generation for production and test equipment. Analysis Software for DFM, DFT and Test Coverage Analysis.

5- Comet Yxlon Cheetah EVO: 3D X-Ray Inspection for electronics components, PCBs, electromechanic components and much more.

GUEST SPEAKERS

Joerg Lewandowsky

Managing director at Systech Europe

Joerg accumulates many years of experience in electronics manufacturing and Takaya Flying Probe Testing. He is supporting the European representatives and Takaya customers since more than 30 years.

Ines Fietze

International sales manager at Göpel electronics

With almost 15 years of international sales experience in the inspection systems market, Ines understands the challenges and inspection needs for reliable quality assurance in electronics assembly and manufacturing.

Jan Heiber

Application Manager at Göpel electronics

Jan is a JTAG expert and testing enthusiast since he started at Göpel in 1998. He is now leading the application team at Göpel for worldwide customer support with JTAG applications.

Christophe Lotz

CEO at Aster Technologies

Founder of Aster and captain of industry with over 30 years experience in developing software tools for verifying, assembling and testing PCB assemblies.

+ ALSO ON DISPLAY

Fully automatic wire bonder & die bonders, Semi-automatic heavy wire bonder and dispensing systems. Testing equipment and generators for EMC compliancy.

PLACES ARE LIMITED
